

Smart VAV

Intelligent VAV integration

- Easy commissioning and integration with other systems
- Consists of plenum box, VAV damper and a wide variety of available diffusers
- Powerful tool for modern, precise and energy efficient ventilation in combination with CODIS controller
- QCB system for quick, reliable and affordable communication cable connection (RJ45)
- Sizes: 125, 160, 200, 250 mm
- Accurate and reliable airflow measurement
- Removable filter for simplified exchange

Smart VAV system components

SPB

Smart plenum box

- Available with calibration ports for easy commissioning
- Low height for easy installation
- Available with preinstalled room sensors
- Replaceable filter
- Maintenance free

RVP

Variable air volume damper

- Volume flow control by a given set-point
- Factory calibration according to project requirements
- High accuracy
- Maintenance free

ODP/KDP

Air diffuser

- Adjustable geometry
- Available in variety of different patterns
- Simple and economical

INSULATION

Acoustic foam insulation

- Convolted foam absorption panel
- Microporous surface for advanced dampening properties
- Made out of flame retardant material
- Good thermal insulation properties
- Fire classification B1: DIN 4102

Save your time & money with QCB system
